***CLASS CREDIT for one hour**

The conference may be taken for one hour credit or for continuing education contact hours. All of the pre/post conference NASA workshop sessions as well as the conference must be attended to receive the credit. On-site registration with Kristie Maher.

BRING A FRIEND and help gifted education to be valued by ALL.

Accommodations

A block of rooms is being held until August 25th at the following motels. Please mention that you are with the SD-AGC when making your reservation.

Best Western Ramkota, 920 W. Sioux Ave., 605-224-6877. \$83.99 single, \$93.99 double occupancy.

Governor's Inn, 700 West Sioux Ave., 605-224-4200. Rooms are non-smoking, two-queen beds. \$75.00 for single or double occupancy.

NASA

National Aeronautics and Space Administration (NASA): A pre/post conference workshop is being offered by the South Dakota Discovery Center and the SD Space Grant Consortium for one credit hour. Participants will attend the pre-conference on Sunday from 1:00-7:00 p.m. and the post-conference on Monday from 3:30-7:00 p.m. NASA unit guides, using the inquiry-based approach, serve as strong curricular support for key science and math concepts as identified in the national standards. Upon completion of the 15 hours, participants who are certified teachers will receive a stipend of \$100.00. Additional questions may be directed to Kristie Maher at the Discovery Center (605-224-8295).

SD-AGC Fall Conference

"Reaching Potential through Sharing"

September 25-26, 2011

REACHING POTENTIAL THROUGH SHARING

2011 SD-AGC Conference

Individuals educating South Dakota's gifted students have an opportunity to network at the annual conference.

Sunday Get Together beginning at 7:00 p.m.

Students with the need for challenge are found in both regular classrooms and gifted programs. Join your colleagues for an opportunity to share valuable information about targeting the needs of these students.

Monday from 8:00 a.m. to 3:00 p.m.

STRAND ONE: Curriculum Development: Dr. Fayer will provide opportunities to apply problem-based learning and backward-design unit development. STRAND TWO: Learning about Gifted Students will include general information about creativity, habits of the gifted student, and professional development for staff. STRAND THREE: Enrichment Programming will highlight exploration activities for students.

Strands were developed for participants to experience greater depth of information during the one day conference. Indicating a strand preference on the registration form helps conference planners, but does not limit individuals from attending desired sessions.

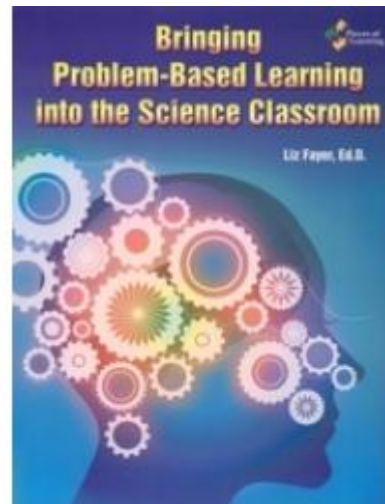

Professional materials will be available for purchase from gifted education publishers: Prufrock, Free Spirit, and Pieces of Learning.

Keynote Speaker

Dr. Liz Fayer

Author and
Coordinator of the BHSU Online
Secondary Certification Program
School of Education, BHSU
